We confirm that the **EUROSPAN®** particle boards, **EGGER MDF**, **EGGER HDF**, **EUROSTRAND® OSB**, **EURODEKOR®** MFC boards are wood based products. Therefore no export treatment is required.

After drying the chips, fibres or strands with more than 150° Celsius to a moisture content under 4%, they are mixed with synthetical glue and processed under high pressure and over 150° Celsius.

This production process can not be survived by any living plant pests. Wood based panels can be used as packing or as pallets without fumigation or heattreatment.

**We confirm that these wood based panels are heat processed, and totally free from any plant pests according to FAO-IPPC-ISPM 15.**

Fritz EGGER GmbH&Co.

Manfred Riepertinger  
Product manager  
St. Johann i.T., 03.03.2009
